Pursuing Graduation

PROJECTS

Self-expense tracker
March 2023*

A self-expense tracker is a software application that helps users keep track of their personal expenses. It allows users to monitor their spending habits and identify areas where they can save money. The application can also help users budget their income and plan their expenses accordingly.

Trip Planner
December 2021 – January 2022

A trip planner is an application or service that helps users plan their travel itinerary. The trip planner can provide users with information on the best flights, hotels, transportation, and tourist attractions based on their preferences and budget. A trip planner can help users save time and money by automating the process of planning a trip.

All in one calculator
February2022 – March 2022

An all-in-one calculator is a software application that combines multiple types of calculators into a single application. It can perform various calculations, including arithmetic operations, scientific calculations, financial calculations, and unit conversions.
